

# HAY PRODUCTION

NORTH DAKOTA

## 25-30% INCREASED TONNAGE

"We applied before the first cutting and saw a 25-30% increase on the first cutting. Haven't taken the second cut yet, but it's definitely looking thicker..."

WYOMING

NEBRASKA

## 43% BUMP IN YIELD

"I think it makes sense for people to do it and I'd highly recommend it. It speaks for itself if you get that many extra bales..."

NEBRASKA

MONTANA

## 40% INCREASED TONNAGE

"It's cold country with a short growing season. We had an unusually cool spring, so that should have put us behind in production... it's turning out to be a 7:1 ROI."

IDAHO

MINNESOTA

## YIELD DOUBLED ON 2ND CUTTING

"Just put up the second cut on the field that was really growing well. Made exactly double plus one more bale than the first cut. Neighbor would like info on the RG..."

NEW MEXICO

## 33% INCREASED TONNAGE

1 EXTRA TON PER ACRE (value: \$250)

Minus Rhyzogreen® cost (\$28/acre)

Minus application cost (\$15/acre)

NET PROFIT = \$207/acre

NEBRASKA

## 10-15% INCREASED TONNAGE

"When we went to bale it, the bales were closer together. The area with just fertilizer had bales roughly 100 yards apart, whereas the fertilizer & RG treated was more like 75 yards apart, just eyeballing it..."
