# WHAT IS RHYZOGREEN & HOW DOES IT WORK?

## WHERE CAN I USE RHYZOGREEN?

It's important to note that Rhyzogreen has shown better performance in **marginal and sandy soils**. Simply put, there's more room for improvement in these areas, so Rhyzogreen makes a larger impact.

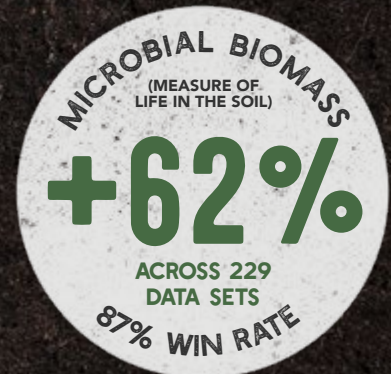

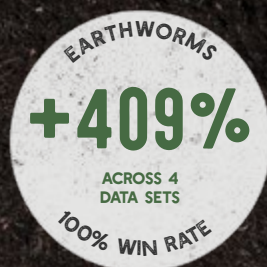

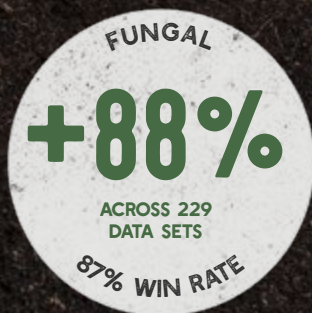

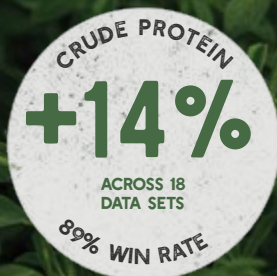

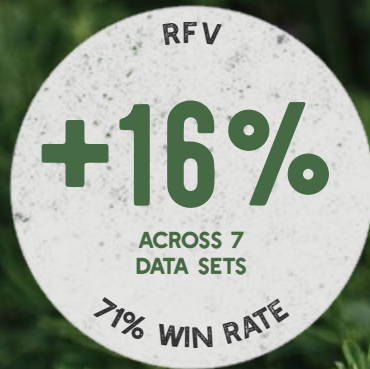

# 20-30% INCREASE IN TONNAGE

## WITH RHYZOGREEN SOIL STIMULANT

AVG. ACROSS 40+ INDEPENDENT HARVEST DATA SETS

RHYZOGREEN

Say you do 2 ton to the acre,  
a 20% increase gives you 0.40 ton extra production per acre.

Assume hay is worth \$200, this 0.40 ton extra  
is worth \$80.00

Now subtract the Rhyzogreen cost/acre out of that  
(\$80.00 - \$28.50)

That leaves the grower with an additional  
NET PROFIT per acre of **\$51.50**

The data is in and the return is solid

## TOO GOOD TO BE TRUE?

As a family business, we know a 20-30% increase can seem too good to be true. So, if that's what you're thinking, we totally get it. We want you to know that the numbers are based on the results coming from our customers, not our trials. So, the 20-30% increase is absolutely solid.

# YIELD SHIELD 2.0

## - GUARANTEED ALFALFA RESULTS PROGRAM -

We realize growers hate risk. So, that's why we're pleased to offer the Yield Shield 2.0 to show our solid confidence that comes from the results that we've seen and at the same time remove the risk for the customer completely. As the owner says, "If I was buying something, that's how I'd want it." Yield Shield 2.0 guarantees you will see results (*in quality or quantity*) on alfalfa in a full season, or we will provide product to cover all the originally applied acres at no charge.

**WHAT:** Alfalfa Only

**WHERE:** Western America Only (see green states on the map.)

**DURATION:** Over a full season (365 days), not per cutting.

**TERMS:** A simple agreement will be signed by the grower to validate this guarantee.

Yield Shield 2.0 application found on our website and must be completed within 30 days of invoice date.

### HOW IS QUANTITY MEASURED?

Tonnage per Acre.

### HOW IS QUALITY MEASURED?

Relative Feed Value (RFV), TDN, or Crude Protein.

*Program Valid for Totes Only*

# WHAT DO growers say?

"The ground I sprayed versus the ground I didn't was about 3 bales to the acre difference... **\$300/acre value. The product has more than paid for itself.** This is something we'll continue to do. It speaks for itself."

NEBRASKA

"We applied Rhyzogreen® after our first cutting on hay...I figure **we saw an average increase of about 20-25% in tonnage across all our land, and that's conservative.** And we only ran water for like a week before application..."

WYOMING

"We're gonna **save approximately \$60 an acre in fertilizer,** and increase yield."

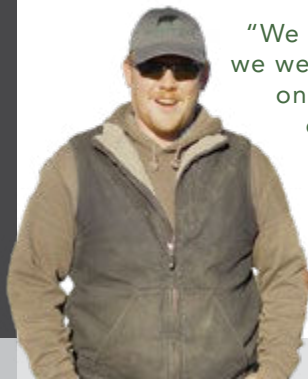

MONTANA

"I manage my soils to maximize return on my ranch...WITHOUT a lot of inputs. **We saw about a 33% increase in tonnage...**"

NEBRASKA

"We knew goin' in that we were gonna be short on hay this year...**we ended up getting about 100 extra bales just by spraying Rhyzogreen.**"

NEBRASKA

"**We had the best yields that I've seen...**around a half a ton to the acre better than the year before."

IDAHO

"...used Rhyzogreen this year and with the yields I've seen... **I will use it again next year, on every acre!**"

IOWA

"It's cold country with a short growing season and we had an unusually cool spring. That should have put us behind in production... **we're seeing about a 40% increase in tonnage.**"

IDAHO

"**Yield was better on alfalfa** and we seen a nice bump in relative feed value."

NORTH DAKOTA

"I've used many different biological products... it's superior to anything I've used or sold...allows you to **cut down on nitrogen by 15% easy.**"

NEBRASKA

"The grass didn't burn off as fast. Stayed green and **kept growing... about 2 weeks longer** I'd say."

MONTANA

"**With the price of fertilizer, you've gotta try utilize what you have...**my plan this year is to use Rhyzogreen on pretty much everything I have."

NEBRASKA

# HOW DO I GET IT?

**START INCREASING YOUR PROFIT PER ACRE TODAY.**

**1 TALK WITH A SOIL HEALTH GUIDE.**

Help us understand your farming/ranching challenges and discuss ways to help you get more out of every acre.

**2 GET RHYZOGREEN WITH FREE DELIVERY TO YOUR FARM OR RANCH.**

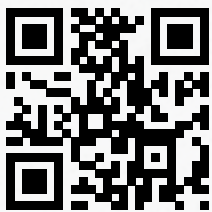

Figure out how many acres you want to cover and place your order - either direct at **888.507.0122** or with your Rhyzogreen dealer if there is one near you.  
Available in **80-gallon (400 acres), 135-gallon (675 acres) and 270-gallon (1,350 acres) totes.**

**3 CONNECTING THE DOTS BETWEEN SOIL HEALTH AND INCREASED PROFIT PER ACRE.**

Enjoy the financial benefits today, and the soil health benefits next season, next year, and next generation!
