

This program guarantees that the use of Rhyzogreen® will improve your soil health within a year after applying it on your crops, or we will provide product to cover all the originally applied acres at no charge.

WHERE

Marginal soils west of the line.

DURATION

Over a full season.
(365 days)

TERMS

A simple agreement will be signed by the grower to validate this guarantee.

HOW IS AN INCREASE IN SOIL HEALTH MEASURED?

We use a MicroBIOMETER test to measure the microbial biomass and fungal to bacterial ratio of the soil of treated plants vs. the soil of untreated plants. This guarantees you will see an increase in either microbial biomass or the fungal portion of your fungal to bacterial ratio, or both.

Program Valid for Tote Size Only

CONNECTING THE DOTS BETWEEN SOIL HEALTH AND INCREASED PROFIT PER ACRE.
