

WHAT DO growers say?

"The ground I sprayed versus the ground I didn't was about 3 bales to the acre difference... **\$300/acre value. The product has more than paid for itself.** This is something we'll continue to do. It speaks for itself."

NEBRASKA

"We applied Rhyzogreen® after our first cutting on hay...I figure **we saw an average increase of about 20-25% in tonnage across all our land, and that's conservative.** And we only ran water for like a week before application..."

"We're gonna **save approximately \$60 an acre in fertilizer,** and increase yield."

WYOMING

MONTANA

"I manage my soils to maximize return on my ranch...WITHOUT a lot of inputs. **We saw about a 33% increase in tonnage...**"

NEBRASKA

"We knew goin' in that we were gonna be short on hay this year...**we ended up getting about 100 extra bales just by spraying Rhyzogreen.**"

NEBRASKA

"**We had the best yields that I've seen...**around a half a ton to the acre better than the year before."

IDAHO

"...used Rhyzogreen this year and with the yields I've seen... **I will use it again next year, on every acre!**"

IOWA

"It's cold country with a short growing season and we had an unusually cool spring. That should have put us behind in production... **we're seeing about a 40% increase in tonnage.**"

IDAHO

"**Yield was better on alfalfa** and we seen a nice bump in relative feed value."

NORTH DAKOTA

"I've used many different biological products... it's superior to anything I've used or sold...allows you to **cut down on nitrogen by 15% easy.**"

NEBRASKA

"The grass didn't burn off as fast. Stayed green and **kept growing... about 2 weeks longer I'd say.**"

MONTANA

"**With the price of fertilizer, you've gotta try utilize what you have...**my plan this year is to use Rhyzogreen on pretty much everything I have."

NEBRASKA
